Beyond Bookkeeping

Presented by AtTally Sofper

The Core Dilemma

Unlocking insights from TallyPrime data

Data Accumulation

Invoices, sales, and inventory data accumulate daily in TallyPrime, creating a **valuable resource**. However, extracting actionable insights quickly can be exceptionally challenging for busy executives.

Retrieval Delays

Static ledgers and multi-level submenus significantly slow down data retrieval, making it difficult for decision-makers to access instant numbers between meetings, ultimately affecting business responsiveness.

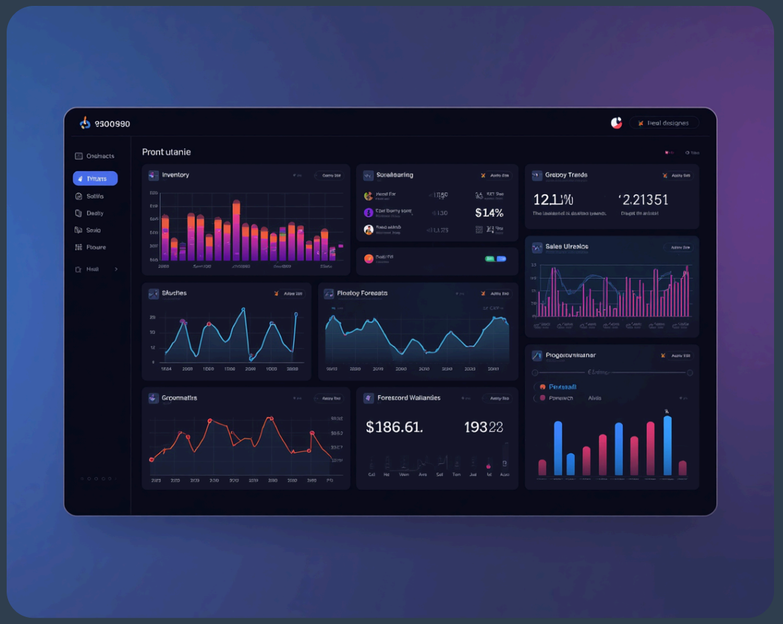
The Dashboard Gap

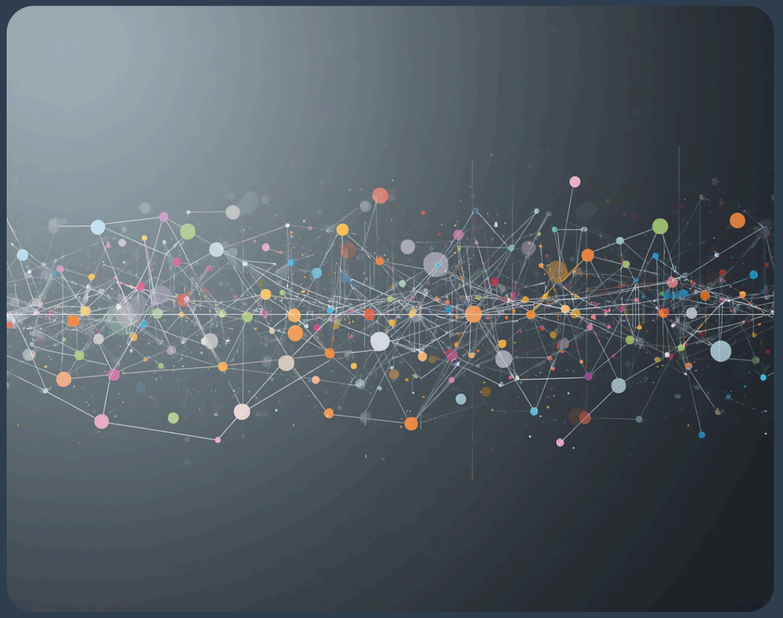
Need for Complementary Visual Insights

While TallyPrime excels in capturing transactional data, it lacks the visual dashboards necessary for quick, strategic decision-making, leaving business owners without timely insights for proactive action.

Visualize Your Business Growth Effortlessly

Transform Tally Data into Actionable Insights





Automate Your Cash Collections

Credflow streamlines the receivables process by automating reminders via WhatsApp and SMS, enabling businesses to collect payments **30% faster**, ultimately safeguarding working capital and business growth.

The 3-Step System

TallyPrime Integration

TallyPrime captures daily transactions accurately, forming the foundation of financial data for businesses, ensuring all sales, inventory, and accounting entries are recorded seamlessly.

Magenta BI Implementation

Magenta BI converts raw Tally data into instant visual dashboards, allowing business owners to gain insights, track performance, and make data-driven decisions quickly and effectively.

Credflow Automation

Credflow automates payment reminders and collections, ensuring businesses receive payments faster, reducing delays in cash flow, and protecting working capital for smoother operations and growth.

Partnering with Experts

Experience

With **27+ years of experience**, we ensure seamless integration and support for your business needs.

Local Support

Our dedicated teams in **Vizag and Vijayawada** provide hands-on assistance and personalized service.

Comprehensive Solutions

We offer **hands-on configuration and training** to empower your team in using the integrated systems.
